**I. Statement of Reasons for Allowance:**

The following is an examiner's statement of reasons for allowance:

The prior art cited herein fails to disclose a tire air pressure monitoring system/method in a tire comprising a control circuitry for determining whether air pressure in the tire is increasing or decreasing with respect to time and determining whether a ratio of the air pressure and air temperature in the tire is increasing, decreasing or remaining constant with respect to time to infer that the tire is moving, motion of the tire being determined without directly sensing acceleration or movement of the tire and a power management circuitry for selectively powering the pressure sensor and temperature sensor at measurement intervals which are shorter when the control circuitry has inferred that the tire is moving than when the tire is not moving.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

II. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Brown discloses a system for monitoring a condition of a tire.

Letkomiller discloses a response adjustable temperature sensor for transponder.

Hebert discloses a method for processing pressure and temperature measurements in a tire monitoring system.

Sackett discloses a telemetry system for tire pressure and temperature sensing.
